Stephanie Brail was not a Scientologist nor had anything to do with what happened in 1998, she didn't even know about it.

Me and Stephanie started a business together called Goldlinks, it was a directory for small businesses.

I met Stephanie in 1996 while working on Yosemite National Park's website, I was contracted to do the HTML on this project by Internet Outfitters.

Stephanie Brail was the founder of Amazon City, her junior designed my logo for free, it was totally cool, women helping other women, flowing each other power.

The taxes were done by Wiseman and Burke, a Scientology owned company.

It's possible that Doreen Doshay Russell and her accomplices and/or Karen Freemon and her accomplices stole them out of my apartment unit on Cumpston. If not them, then in 1998 they were stolen by either Jon Mackinder, and/or OSA while I was unconscious and being held hostage or the landlord after that.
